Heavy rain showers	Drizzle	Light rain showers	Light rain showers	Dull	Partly cloudy (night)
Precipitation probability					
70%	60%	60%	40%	20%	10%

Forecast for Monday 25 Jul 2022

Weather: Rather cloudy across the Brecon Beacons with scattered showers, some of these locally heavy during the morning with an outside chance of the odd rumble of thunder. Cloud breaking from early afternoon with showers becoming increasingly isolated, however outbreaks of drizzle and light rain may continue to affect mostly windward upslopes. A drier evening with clear spells.

Chance of cloud-free hill tops above 600m: 30% rising to above 90% by early-afternoon.

Low cloud and visibility: Broken cloud with bases around 500-600m initially obscuring the higher peaks. Bases of around 400m expected on upslopes this morning. Cloud bases will lift clear of summits during the early afternoon with good breaks developing. However, summits may become briefly shrouded in association with showers. Good visibility outside of cloud and rain, with distant hills visible by the evening. Poor visibility likely in and around rain, drizzle, and heavier showers.

300	14/12	14/12	16/14	15/13	15/13	13/12	11/10
Valley	14/13	15/13	17/15	16/14	16/14	14/13	11/10
Freezing Level*	2700m	2600m	2600m	2600m	2500m	2300m	2200m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Cloud bases on or below summits, mainly during the morning, will give rise to intermittent navigational challenges. Sudden deteriorations in conditions likely given the occasional showers, with surfaces turning slippery underfoot. Appropriate footwear and wet weather gear is recommended.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Mon 25 Jul 2022	8.8mm	12mm	13mm

Forecast for Tuesday 26 Jul 2022

Weather: A fragmenting band of cloud, rain and drizzle will sink south across eastern Brecon Beacons during the morning, with clearer skies in the west. Cloud breaks developing widely to give a much brighter afternoon with long sunny spells, although the odd shower still possible.

Maximum wind: Northerly to northwesterly 10-15 mph with gusts to 20mph

Chance of cloud-free hill tops 600m: 90%, but 70% in the east during the morning.

Low cloud and visibility: Cloud bases around 600m expected across eastern parts during the morning, obscuring the higher summits. Cloud lifting largely clear of summits by late-morning. Visibility generally very good, although poor in early rain or drizzle and in any showers.

Temperature: **Valleys:** Plus 12 Celsius becoming plus 20 Celsius.
At 600m: Plus 6 Celsius becoming plus 11 Celsius.
Freezing level: Well above the summits.
